

MB Docket No. 04-233

KLOVE radio is a most important element of our community. They provide a positive and enlightening source of entertainment and messages. It is a place my family and I can tune and not have to worry about negative or inappropriate music being played. There is no need for a 5 second delay because of content.

It would be a disservice to have KLOVE displaced by a commercially driven station that's only concern is how to make money not how to serve the community in a positive and encouraging form. The music and messages from KLOVE provide a bright place on my radio to lift me in times of turmoil. In these times of strife, war and disillusionment it is stations like KLOVE that provide a positive environment for my family and friends to tune to strengthen our spirits in difficult times. It is my belief that KLOVE is one of the best stations available to provide positive music and messages that we need as a country.
